## The United States of America: from fake dream, to real nightmare

by Mees Baaijen (3100 words)

### Abstract

The long-announced fall of superpower USA is quickly approaching. However, that does not end the secret, 500-year-old project of a globalist predator class to dominate the world: they set up the USA as a proxy state, to make it their fourth hegemon after Spain, Holland and England. Two fresh horses will now pull their chariot: China and Russia.

### From Paradise, to globalization and Farm Earth

*The greatest challenges facing mankind are distinguishing reality from fantasy, truth from propaganda.*

Michael Crichton (1942–2008), American science fiction author

Long ago, after “eating from the tree of knowledge of Good and Evil” in Paradise, an unprecedented development of the human potential took off, both for the *Good* (agriculture, science, art, script, crafts, certain technologies), as well as for *Evil* (slavery, usury, abuse, wars, certain technologies).

Already 5000 years ago, the resulting civilizations, with hierarchic societies and improved technologies, led to *globalization*: the global trade - of bullion, multicolor slaves, spices, and luxury products - became the “rich trade”. This enabled enormous accumulations of *capital* in Asia, Africa and Europe. *Usury* took flight, and *oligarchies* developed. But only Europe became the “monstrous shaper of world history” (F. Braudel).

Here's why: around 1500, after many failed attempts to control the world by blunt force, an innovative global domination project was set up by Venetian, Genoese, and ex-Iberian Jewish merchants and bankers, here called Glafia. Their hidden and totalitarian project - to run the world as their private Farm Earth with us humans as their cattle - was based on *shrewd deceit* and *mobile capital*.

They knew that their aim could only be reached covertly, through *proxies*. Not coincidentally (Barbarossa's lost struggle against the Guelphs in the 12<sup>th</sup> century), nation states were on the rise in Europe. They would even create a new nation state for their globalist project: the United States of America.

### **Fake sovereign Nation States, Glafia's first proxies**

*Taking the State wherever found, striking into its history at any point, one sees no way to differentiate the activities of its founders, administrators and beneficiaries from those of a professional-criminal class.*

Albert J. Nock (1870-1945), American journalist

In the 15<sup>th</sup> century, a small group of Genoese bankers accidentally discovered that they could "remote-control" the Spanish empire through *mobile capital*, a fact which hardly any historian has noticed. Glafia then used this template systematically: it infiltrated, corrupted, and captured the upcoming European nation states, which they then controlled via usurious central banking (their mobile capital, protected by national laws), bribery and investments, and deceit: fake democracies, and falsified science and history. In this first phase of their domination plan, Glafia tasked and financed these nations to explore and colonize the Third World.

By dominating the money system and injecting capital in these captured – fake autonomous and fake sovereign - nation states, normally impossible projects could suddenly be carried out: large scale discoveries and colonizations, revolutions, wars, science, technology, and industry, and what is called "development". This ended a long period of organic growth.

The unique *fusion between the state and capital* was the key for their success (F. Braudel; G. Arrighi). By now, all "sovereign" nation states have been captured, including China, Russia, North Korea and Iran.

Yes, anarchists were right about the perfidious role of the nation state!

### **Glafia's hegemonic cycles**

In their hierarchic approach, only one leader state controlled Glafia's other subordinate nation states: the first *hegemonic cycles* were successively run by Spain, Holland, and England. Together with France, they also colonized the lands where the future nation state of USA would be founded. Each hegemonic cycle was divided into three phases:

1. A merchant or accumulation phase (often financed by the previous hegemon).
2. A phase of industrial expansion.
3. The final phase, a period of financialization dominated by the banking sector (the early merchants, turned into bankers).

Catholic Spain, then the greatest empire of the world, was sidelined as their hegemon, for not being usury and Jew-friendly. From the mid-16<sup>th</sup> century on, Holland and England were groomed to become Glafia's next, now Protestant, hegemons. The Reformation, the Dutch war for independence from Spain (1568-1648), the Cromwell and Glorious revolutions in England, the central banks in Holland (1609) and England (1694), and the fake democracies and the East India Companies in both, were all Glafia-steered and financed.

From the 1830's, preparations started to make the United States of America their fourth hegemonic proxy. Karl Marx knew this game of "ever stronger hegemonic states", but he focused on class struggle and labor value instead. The bankers who paid him loved it!

### **The USA: another Glafia project**

*The individual comes face-to-face with a conspiracy so monstrous he cannot believe it exists. The American mind has not come to a realization of the evil which has been introduced into our midst.*

J. Edgar Hoover (1895-1972), director of FBI (USA) for 37 years

Before Columbus set foot in 1492, the Americas had been discovered many times, and detailed maps (Piri Reis) of the East Coast were available in the West. One of the great strengths of the Venetian and Genoese oligarchs was their global intelligence network (*Financial Vipers of Venice*, by Joseph Farrell). They most probably knew that there was a great New World with a high potential for colonization, and Columbus' goal of finding a new route to India was most likely a cover story for the planned exploitation of the Americas. Moreover, "that epoch-making expedition of 1492 was largely a Jewish, or rather a Marrano [Jews allegedly converted to Christianity] enterprise", according to historian Cecil Roth.

The British waited until 1607 (when the Venetians had carved out a strong foothold in Britain, including the British East India Company) to colonize the future lands of the US: the Virginia Company in Jamestown was a joint-stock company chartered by King James I, and financed by private investors of The City, London, a prime hub for Glafia.

Fast forward to 1776, when at the kickoff of the American Revolution, Thomas Paine (member of a Glafia-steered Freemasonic secret society) helped to inspire the Patriots against the Royalists with his influential pamphlet *Common Sense*. Yet the whole USA Independence was a charade, according to Jerry Fresia's book *Toward an American Revolution: Exposing the Constitution and Other Illusions*. The blatant hypocrisy of the founders and later historians – who promoted the mythology of an exceptionalist Christian nation, part of a divine plan - was built in from the start.

The stirring rhetoric of "We, the people" - still uttered today by dementing Ol' Joe, an apt symbol for the USA's present downfall - was written by slaveholders and killers of indigenous people: the Founding Fathers. They were all very rich, and Freemasons (Gliafia proxies):

their Washington DC headquarters bulging with masonic symbols, while printing “In God We Trust” on their coins and banknotes – yet Freemasons don’t believe in God, but in materialist science. They proclaimed a Republic, yet they were from British peerage families (blue-blooded Glafia proxies). And they were mainly financed by the British East India Company (= The City = Glafia), so the USA Constitution was focused on the protection of private property.

At his surrender at Yorktown, 1781, British General Cornwallis revealed to General Washington that:

“a holy war will now begin on America, and when it is ended America will supposedly be the citadel of freedom, but her millions will unknowingly be loyal subjects to the Crown [=The City = Glafia] ... and in less than two hundred years, the whole nation will be working for divine *world government*.”

That sure came to pass. From the 1830’s, the USA was groomed as Glafia’s next, and fourth, hegemon. It became the destination of British expertise and Rothschilds mobile capital, via a network of newly created “robber barons” (oligarchs) as Glafia’s “subordinate elites” (the Rockefellers, Harrimans, Morgans, Duponts, Astors, Carnegies, etc.). Webster Tarpley and Charles Higham wrote on these developments:

"By the end of the 1890's, Morgan and Rockefeller had become the giants of an increasingly powerful Money Trust controlling American industry and government policy... Some 60 families formed a close network of plutocratic wealth that manipulated, bribed, and bullied its way to control the destiny of the USA."

The planned split with Britain ended in 1897 with a secret Anglo-American deal for the conquest of Eurasia (E.C. Knuth, The Empire of The City). A striking aspect was the American struggle against the British/Jewish banking cartels. But it wasn’t usury as such they rejected, only foreign usury. Yet a Glafia-controlled US Central Bank had to be set up. German-born Jewish bankers Paul Warburg and Jacob Schiff played key roles in the belated and fraudulent foundation of the Glafia-owned Federal Reserve Bank (FED), in 1913.

That was just in time to finance the second phase of Glafia’s global project (for the first time with the US as global creditor), for which the First World War was the overture: *The Great 20<sup>th</sup> Century Slaughter of Eurasia*, in which over 200 million people were killed by wars, crises and communist revolutions. It was fully staged by Glafia’s arch-fascist Anglo-American-Zionist proxies: they set up all bogeymen, communism and Hitler included. Yet they managed to come out of the carnage they themselves caused as the greatest heroes of liberty ever, serenaded every year since!

Cunningly, Glafia’s Eurasia project also eliminated the US’ largest upcoming competitors, Russia and China, by betraying them into communism, the Predators’ favorite population control system. And they also succeeded in setting back their European “friends” – just as is

happening now because of their Ukraine war. So much for their rhetoric of “freedom, democracy and free trade”, a false explanation for the meteoric career of the US in becoming the champion of capitalism and liberalism.

After the staged financial crisis of the 1930’s (“We did it”, FED director B. Bernanke, almost a century later), Roosevelt’s New Deal was planned as a steppingstone to a merger between capitalism and communism (Antony Sutton; Norman Dodd). However, the Cold War scenario was seen as a more attractive option, with a higher potential for wars, which Glafia and its minions like for many rea\$ons. Anyhow, that merger is still on the agenda, now as *The Great Reset*, part of Glafia’s *End Game*.

After World War 2, the US lived a short “golden era”, during which it completed its Glafia ordained task of bringing all nations states – including over a hundred now “independent” ex-European colonies - under control of its informal empire via subordinate elites (“sons of bitches, but our sons of bitches”). Much of it was done under the banner of the United Nations, which the Rockefellers had set up.

Just as the alleged Jewish safe haven in Palestine, the “exceptional” USA became another Glafia WAR state, "based on the principle of genocide" (Noam Chomsky). Or as former US president Jimmy Carter said: “The USA is the most warlike nation in the history of the world”. The City of London, Glafia’s main hub, was always present:

- At its birth in 1607, in Jamestown.
- Its passing to adulthood in 1776.
- Its staged bloody, brotherly quarrel in the American Civil War (1861-’65).
- The fraudulent foundation of the Federal Reserve Bank in 1913.
- Its extreme expansionism that killed tens of millions of innocent people standing in its way (US Indians, Filipinos, Koreans, Vietnamese, Iraqis, Afghans, Palestinians, Ukrainians, etc.).
- Its genocidal treason in staging, with the British and Zionists, the conquest of Eurasia, with numerous protection rackets: the World Wars, the 1930 and other financial crises, and the Cold War.
- And also 9/11 & the War on Terror, the wars on drugs, CO<sub>2</sub>, Covid, etc.

Already in 1971, Glafia brought its US hegemon into its financialization, and final, phase. With its proxy tasks fulfilled, the USA is now being disposed of, and Glafia’s *End Game* is being implemented.

Glaflia’s first End Game project: the multipolar world order

In 1956, the Rockefeller *Special Studies Project*, directed by Henry Kissinger (RIH), prepared a blueprint for a multipolar New World Order, Prospect for America (1961). It speaks of regionalized blocks of nations (like the later EU and NAFTA blocks) under a world government based on the (Rockefeller steered) United Nations, including "functional structures" for matters that require management beyond regional boundaries. The Rockefeller-planned BRICS alliance cuts across such regional lines.

In the following years, Kissinger went to great lengths to spin this plan as being in the best interest of the American people. His lies succeeded in duping the USA to sacrifice a large part of its industries and self-reliance, so China could be pulled into the New World Order, where it would only agree to participate as its global leader.

Already in 1919 (three years before they headhunted Hitler in Munich), Mao had been spotted at "Yale in China", an outpost of US intelligence. The US secretly betrayed China into communism (James Perloff), to allow the foundation of a Glafia-desired totalitarian state. After David Rockefeller visited China in 1973 with his faithful agent Henry Kissinger, he was very satisfied about this - or should we say "his" - experiment:

"Whatever the price of the Chinese Revolution ... this social experiment in China under Chairman Mao's leadership is one of the most important and successful in human history".

With "whatever the price", Rockefeller coldly referred to the tens of millions of victims of Chinese communism. Ten years later, Antony Sutton prophesied:

"By about the year 2000, Communist China will be a "superpower" built by American technology, [capital] and skill ... And who's to say that the Chinese Communists will not make their peace with Moscow after 2000 and join forces to eliminate the super-super-power – the United States?"

In recent years, it was easy to see how all Western actions against China and Russia – the Ukraine war included – had their unification as their main goal. Yet another Glafia project to shift the global balance of powers is reaching its harvest time. History shows that the Predators have no loyalty to any nation, religion or race, and Glafia-steered China - under the very same old formula of the fusion of capital and the state, just as in Russia - is now simply their best totalitarian and hegemonic model.

### **A major change of cycle is now ongoing**

For the first time in 500 years, Glafia is moving East, under the shiny but false brand of a benevolent multipolar world order. While the still largely dormant USA and the rest of the West are steered into an abyss, its new Eastern horses are fed, brushed, and harnessed to pull Glafia's same old chariot.

During previous hegemonic changes, wars were always on the menu. And so it is now. The Western “elites” know that the East will irrevocably take the baton over (Macron first announced this in 2019), but before that, both parties (both Glafia proxies) agreed on a bloody theater war in the Ukraine, to dump their old hardware, test their new weapons, train their armies (Russia) and fill their pockets and vaults to the brim. Remember that all nation states are now captured as Glafia proxies, and that they are all led by gangsters, or as Cicero called them, “traitors within the gates”.

The war in Gaza fits a similar Glafia purpose. Under the new Eastern paradigm, the dehumanized Israelis (by Glafia design, just as the British did long ago in Ulster: the Jews were duped to enter the Zionist cage in which they were constantly poked) are an obstacle that must be removed. Glafia’s fake grassroots pawns (Greta, Extinction Rebellion and woke students on elite universities) are suddenly supporting the Palestinian cause: a red flag. That’s morally right, but it also fits Glafia’s agenda! If you believe Scott Ritter, Israel is already in checkmate, and so is the US. They can’t defend themselves against the new generation of Eastern hypersonic missiles.

This advanced weaponry was probably developed by the “breakaway civilization” (C. Austin Fitts) with money stolen from the US government. Impossible? During WW2, atomic secrets and construction materials for nuclear plants were air shipped from Great Falls, Montana, to the USSR, so it could become a worthy enemy in the Cold War (*From Russia with Thanks, Major George L. Jordan*). Or see Antony Sutton’s *The Best Enemy Money can Buy* on how the US set up the USSR. If you still don’t believe it, have a look [here](#) (Bloomberg, 2024): North Korean rockets are made with Western parts. As Shakespeare wrote 500 years ago:

“All the world’s a stage”.

At some point in the near future, the US, the EU, and NATO will suffer a humiliating defeat in a conflict with Russia and China. Traitor Boris Johnson and some EU bobo’s already hinting at it. That will end the present bipolar global disorder and bring in a new unipolar order under communist China, which will become as self-righteous and “exceptional” as the USA, and probably worse (read *The secret speech of General Chi Haotian*).

Indeed, the short “American Century”, despite its monstrous violence and corruption, will probably be remembered with nostalgia (Alfred W. McCoy, *Endless Empire*).

### **The second End Game project: the Global Digital Prison**

With ALL LANDS colonized, the next phase is to bring ALL PEOPLE under individual control, this time via *technology*: the Global Digital Prison, in preparation since at least 60 years, in a major effort to develop *digital surveillance, data collection and coercion technology*, as announced by Brzezinski in 1970 (*Between Two Ages: America's Role in the Technetronic Era*). Presently, the WEF calls it the *Fourth Industrial Revolution*.

Glafia's proxy system has become far too convoluted, and a simpler and stricter digital technology control system will substitute it – if we let it happen. Think CBDC, digital ID, UBI, social and carbon credits, 15-minute cities, compulsory vaccinations, lab&bug food, and blanket censorship. For this part of Glafia's *End Game*, 9/11 was the overture, and Covid a trial run. But the package to subdue us will include more: the largest financial crisis ever, as well as food and energy scarcities, and more and more war and germfare: it will be like the Seven Plagues of Egypt.

The crisis of the West may become as severe as the one Russia suffered after the planned collapse of the Soviet Union, where male life expectancy at birth fell by six years between 1991 and 1994. For sure, Glafia's centuries-long confidence game with the West's pseudo-democracies is now ending, and the velvet glove is slowly but steadily being removed from the Arch-Fascist fist.

I don't think it's an exaggeration to say that the West's largest man-made nightmare in the last 500 years is coming, and that you'd better prepare for it. Please spread the word so that awareness can grow!
